

## Why to cut your own Christmas tree or pick a fresh one?

There are many benefits to having a freshly cut Christmas tree in your home. Choosing and cutting-Your-Own is not only a great family fun but fresh trees, when brought indoors, benefit to our health. Freshly cut conifers take carbon dioxide out of the air and release oxygen into our home. They also smell great. It is known that the scent of a fresh cut pine improves people's mood and helps fight depression. Also, cutting your own tree inevitably involves visiting a local farm, possibly meeting and talking to your local growers.

So, if you have not purchased your Christmas tree yet, consider getting it from one of these farms in near you:
