Agriculture Information Service

Enroll today to get the latest ag information from the experts!

Northwest New York Dairy, Livestock & Field Crops Program

- Specialists work together with Cornell faculty and extension educators statewide to provide service to the farms large and small whether dairy, livestock, hay, corn, wheat or soybean focused.
- Part of the Cornell College of Agriculture & Life Sciences' Pro-Dairy program outreach.
- Educational programs and individual assistance cover a wide area of best management practices and as well as dairy farm business.
- Educational and support venues range from on individual farm management team meetings and troubleshooting to multi-day classroom and hands-on training and from ongoing farmer group discussion meetings to thematic day long symposia.
- **Website:** nwnyteam.cce.cornell.edu

Cornell Vegetable Program

- Specialists work together with Cornell faculty and Extension Educators statewide to address the issues that impact the commercial vegetable industry.
- Providing educational programs and information to growers, processors and agri-business professionals, arming them with the knowledge to profitably produce and market safe and healthful vegetable crops, contributing to the viability of farms and the economic wellbeing of New York State.
- Program focus is on food safety, variety evaluation, market development, pest management, and cultural practices.
- **Website:** cvp.cce.cornell.edu

Lake Ontario Fruit Team

- Provide educational programs for the commercial fruit industry, using research-based information to help the tree fruit and berry industries in New York compete in the world market and provide safe, high-quality produce for consumers.
- Maintains competitiveness and profitability of NY fruit farms in a global market;
- evaluate new technology for potential increases in efficiency through applied research.
- Assists in the adoption and implementation of appropriate technologies; reduce financial, legal, labor, environmental, and health risks
- Improves production and delivery of high quality fruit to consumers.
